

UNDER THE FALLING SKY

A
Warm and lovely mystery, fire smiling through
E G D
Before this moment fades away I want to know you
A
I've got lightnin' in my pocket, thunder in my shoe
E G D
Have no fear, I've got somethin' here I want to show you
A A/G F#m A
Low, under the falling sky Easily we will lie while I bring it to you

It's a low road, a high wire going from me to you
And in your eyes the distance left is closing
I've got a feelin' in my oceans, blood underneath my skin
That into your bright fields this prison is opening

C G D

A A/G
Our shadows wake each day, though they don't know why
F#m D
They hope and try, live and die
C#m F#m
So leave them in their frozen world
D A
Come and be my lover
C#m F#m D A to transition
If only for one stolen moment we will live forever

Hey, warm and lovely mystery, can you hear the choir?
Voices can no longer hold my desire
Just abandon your sad history and meet me in the fire
Our angels wait to take us higher and higher
Higher and higher F#m to A repeating -- to end.
